Denomination of Origin

The vineyards are located in the new and exclusive D.O. called Maipo Andes, within Maipo Valley. This D.O. is conformed by 5 districts south of Santiago City and this is one of the best places in Chile where brdeau red varieties can be produced.

Terroir

Climate: In the foothills of the Andes Maountains the climate is dry-mediterranean with a long ripening season without any rain during the summer and harvest. The warm day temperature and the cool nights are exceptional for obtaining high quality red wines.

Soil: Our vineyard is located in Chada sub appellation. Our soil is in the origin coluvial from the erosion of volcanic rocks from the Andes. This old soil has high fertility but with a lot of porosity, a lot of this soil have a very good drainage.

Vineyards

Vineyards planted in 2005 with high density, 8.000 plants per hectare. Drip irrigation system that allows an excellent water management. The production is 1.5 kilos per plant. Total surface of 90 ha.

Production

Yield 8 ton, per hectare and a production of 1,5 kg/pl.

Vintage

In general, the vineyard has a semiarid Mediterranean climate, with an average annual rainfall of 350 mm.

The year was relatively dry, with an average rainfall of 250 mm. In terms of temperatures the season was moderately warm during the months of December and January, then in February, the nighttime temperature was cool under de 12 Celsius (70% of the night) wich gave way to a higher expression and concentration of aromas en flavors in grapes and wines

Tasting Notes

A greatfull red with subtle lips of ripe cherry, plums and raspberry dark, well focused and lively, ending with a roasted coffee cedar. In the mouth have a nice body, very well balanced, soft tannins, vibrants estructure and a very long finish.
